

Tecco Spring Collection – Only the Finest Papers
Paperpioneer Tecco presents new high-end papers in exhibition quality
Heavy Baryt paper for Photography and finest cotton for Fine Art:
»Tecco Baryt Glossy« and »Tecco FineArt Rag«

Bergisch Gladbach, March 26th, 2010

Tecco, paper pioneer and premium partner for photo, fine art and proofing media, present their spring collection for photography and Fine Art printing, a Baryt paper »Tecco Baryt Glossy« and a Fine Art media »Tecco FineArt Rag«. These premium papers complete the top of the professional market segment. Due to quality, weight, strength and durability, they are positioned at the top of Tecco's product range.

The Papers in Detail: »Tecco BTG300 Baryt Glossy«

Tecco meets the market's needs referring to the enormous demands for heavy papers and now offers their third Baryt paper, after 270g and 290 g now 300g.

The fiber-based »Tecco BTG300 Baryt Glossy« offers the typical characteristics of a classical Baryt photo paper with smooth glossy, ultra-white surface. Due to its multiple microporous glossy coating it is ideally suited for extremely sharp and high contrast prints. Ideal for color and black-and-white prints with an extraordinary density in exhibition quality.

»Tecco BTG300 Baryt Glossy« is – in agreement with DIN 6738, ISO 9706, ANSI Z 39.48-1992, neutral sized, 100% acid-free, has a neutral PH-value and therefore is very durable. It complies to the highest durability class with a life expectation of more than 100 years. The weight is 300 g/m², strength is 330 μ , opacity 99%, storage conditions are 15-30°C (40-60% RH).

Differentiating factors towards Tecco's existing Baryt papers

The new paper differs from the existing papers with a higher grammage and a higher white and glossy level.

The Papers in Detail: »Tecco PFR450 FineArt Rag«

Tecco's first FineArt Rag media found great approval especially at exhibitions. Here too the market demanded for heavier materials.

The very heavy and nature white »Tecco PFR450 FineArt Rag« has a very fine surface structure. The special coating guarantees a very high image sharpness with deep black tones and big color space. It is 100% cotton.

»Tecco PFR450 FineArt Rag« is - just like Tecco's other FineArt papers - in agreement with DIN 6738, ISO 9706, ANSI Z 39.48-1992, neutral sized, 100% acid-free, has a neutral PH-value and therefore is very durable. It complies to the highest durability class with a life expectation of more than 100 years. Weight is 450 g/m², strength is 635 μ , opacity 99%, storage conditions are 15-30°C (40-60% RH).

Both media are available in format up to DIN A1. The new Baryt Glossy is also available on roll up to 60 inch. ICC RGB profiles are free-of-charge on Teccos web site.

Exclusivity and immediate Availability

Accustomed to Tecco's well-known variety of formats (from 15x20cm up to DIN A1) both brand new papers are unique and unrivaled in the market. Tecco's top papers are available through qualified dealer network partners only.
